

REMARKS

Applicants kindly thank Examiners Sirmons and MacNeill for the discussion of the claims in this application during the personal interview on November 27, 2007. An injector device assembly was demonstrated during the interview. The limitations relating to the cover ensuring sterile conditions of the infusion set within the device housing were also discussed.

Applicants have amended claims 50, 72 and 90 to further define and emphasize the relationship between the cover and the injector device housing as discussed. New claims 97-100 have been added that also address the relationship between the cover and the injector. No new matter has been added. Support for the amendments and the new claims may be found throughout the specification and in the originally filed claims. Reconsideration is respectfully requested.

IV. SUMMARY

It is respectfully asserted that the claims properly define the invention and that the invention is both novel and non-obvious. Allowance of the present claims is earnestly solicited.

Should the Examiner wish to discuss any of the above submissions in more detail, the Examiner is asked to please call the undersigned at the telephone number listed below.

Respectfully submitted,

December 10, 2007
